The Handheld Experts!
#1 in Route Delivery Software.

Finding One System To Meet All Their Needs

In business since 2002, Shred Quick is a Florida-based information destruction company that has received many accreditations including the AAA Certification by the National Association for Information Destruction. They strive to protect businesses with secure, on-site shredding and destruction. Shred Quick provides an unprecedented guarantee of "on time or shred free."

FACING CHALLENGES

With 10 employees, Shred Quick is busy meeting the needs of all of their customers. They were facing many in house complications before they met Advantage Route Systems. These problems included:

- Large amounts of paper work
- Very slow internal processes
- Scheduling in ACT and billing in Quick Books resulted in double entries
- Entering data into two locations was consuming the office staffs time.

ARS BRINGS CHANGE

With high standards and a long list of needs, Shred Quick met with ARS President and CEO David Kroutil at the 2006 NAID Convention. It was not long after that when Shred Quick went live using Route Manager 2000. All of their needs were assessed and a software package was then put in place to make operations more efficient.

IMPROVED EFFICIENCY WITH ROUTE MANAGER

Shred Quick has been very impressed with several different aspects of the Route Manger Program. Some of the areas they find especially impressive and crucial to business are:

- Information flowing easily in and out between office staff and drivers.
- Sales increased because they could focus on growing their business with freed up time
- Assist customers quicker with accurate information

Office Manager Misty Sturges comments on Shred Quick's new found efficiency since implementing Route Manager 2000.

"Route Manager has saved us a lot of time.

Before it took almost a whole day to plan out routes for the week, now they are able to do it in about 15 minutes."

This is obviously a huge improvement that any operation would take note of. ARS was able to meet Shred Quick's expectations and implement a software solution that has resolved all their previous challenges. The company now runs more efficiently than ever and has made huge improvements to their internal processes.
