EF 2000
Advanced Communications
Advanced Mapping

March 2008

The Handheld Experts!
#1 in Route Delivery Software.

One System For All Their Needs

In business since 2002, Shred Quick is a Florida based information destruction company that has been awarded many accreditations including the AAA Certification by the National Association for Information Destruction. They strive to protect businesses with secure, on site shredding and destruction. Shred Quick maintains high levels of insurance to protect their customers and provides an unprecedented guarantee of "on time or shred free."

FACING CHALLENGES

With 10 employees, Shred Quick is busy meeting the needs of all of their customers. They were facing many in house complications before they met Advantage Route Systems. They were dealing with large amounts of paper work and very slow internal processes. When they made initial contact with ARS they were scheduling in ACT and billing in Quick Books. This made for many double entries and the redundant work load of entering data into two locations which took a great deal of time at the office.

ARS BRINGS CHANGE

With high standards and a long list of needs, Shred Quick met with ARS President and CEO David Kroutil at the 2006 NAID Convention. It was not long after that when Shred Quick went live using Route Manager 2000. All of their needs were addressed and one software package was put in place to make operations more efficient.

IMPROVED EFFICIENCY

Shred Quick has been very impressed with many aspects of the Route Manager Program. Information now flows easily in and out between office staff and drivers. They are saving a tremendous amount of time daily giving them the chance to grow their business, sell their services, and lend a helping hand to customers. Office Manager Misty Sturges comments on Shred Quick's new found efficiency since implementing RM2000, "it has saved a lot of time. Before it took almost a whole day to plan out routes for the week, now they are able to do it in about 15 minutes." This is obviously a huge improvement that any operation would take note of.

ARS was able to meet Shred Quick's expectations and implement a software solution that has resolved all their previous challenges. The company now runs more efficiently than ever and has made huge improvements to their internal processes.
